Get additional income from monthly fees in Dentacoin (DCN) cryptocurrency

Focus on prevention and build solid, long-term patient relations

Set up an in-house assurance by your own rules, with no intermediates

FREE

Take advantage of a FREE, easy-to-use, and highly automated solution

HOW IT WORKS IN 5 STEPS:

1

Register at www.assurance.dentacoin.com. Make sure you use the form for "Dentists" and fill out the necessary information. Wait for approval (up to 72 hours).

2

After examining a suitable patient (e.g. someone with no major dental issues or just after full treatment), offer them to conclude a Dentacoin Assurance contract. Agree on the conditions - monthly fees and services covered.

3

Jump back to the website to create and send them a written proposal. Your patient can register for free to check it out. If agreed, they should just sign the contract, charge their account, and activate monthly payments.

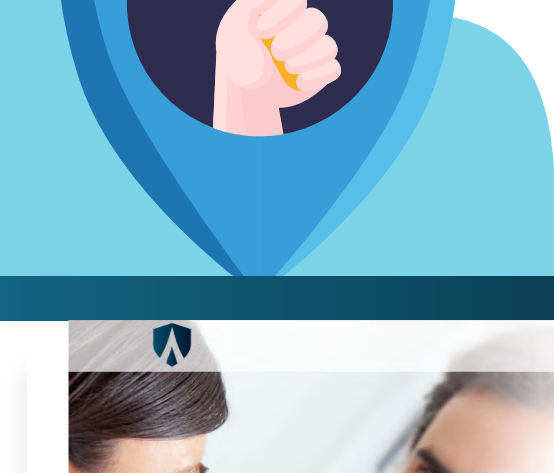

4

Provide the agreed check-ups, tooth cleanings, and other services. Collect your monthly payments from all Assurance contracts, cancel and create new contracts with no intermediates.

5

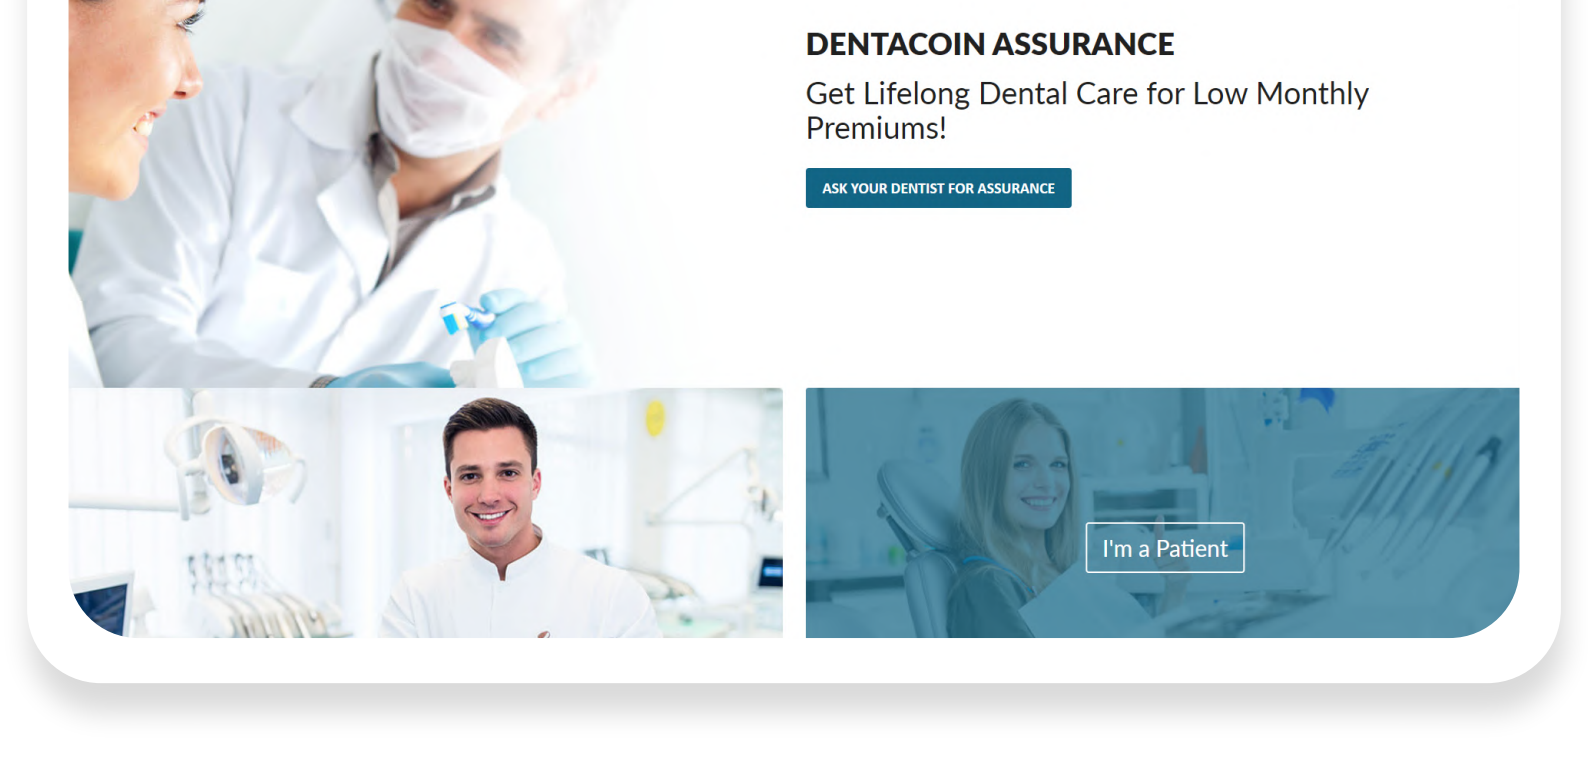

Build a loyal patient base to retain for long by showing them you truly care about their health. Get promoted for free as a Dentacoin Assurance partner dentist and improve your reputation as a trendsetting practitioner!

HOW TO ENGAGE YOUR PATIENTS:

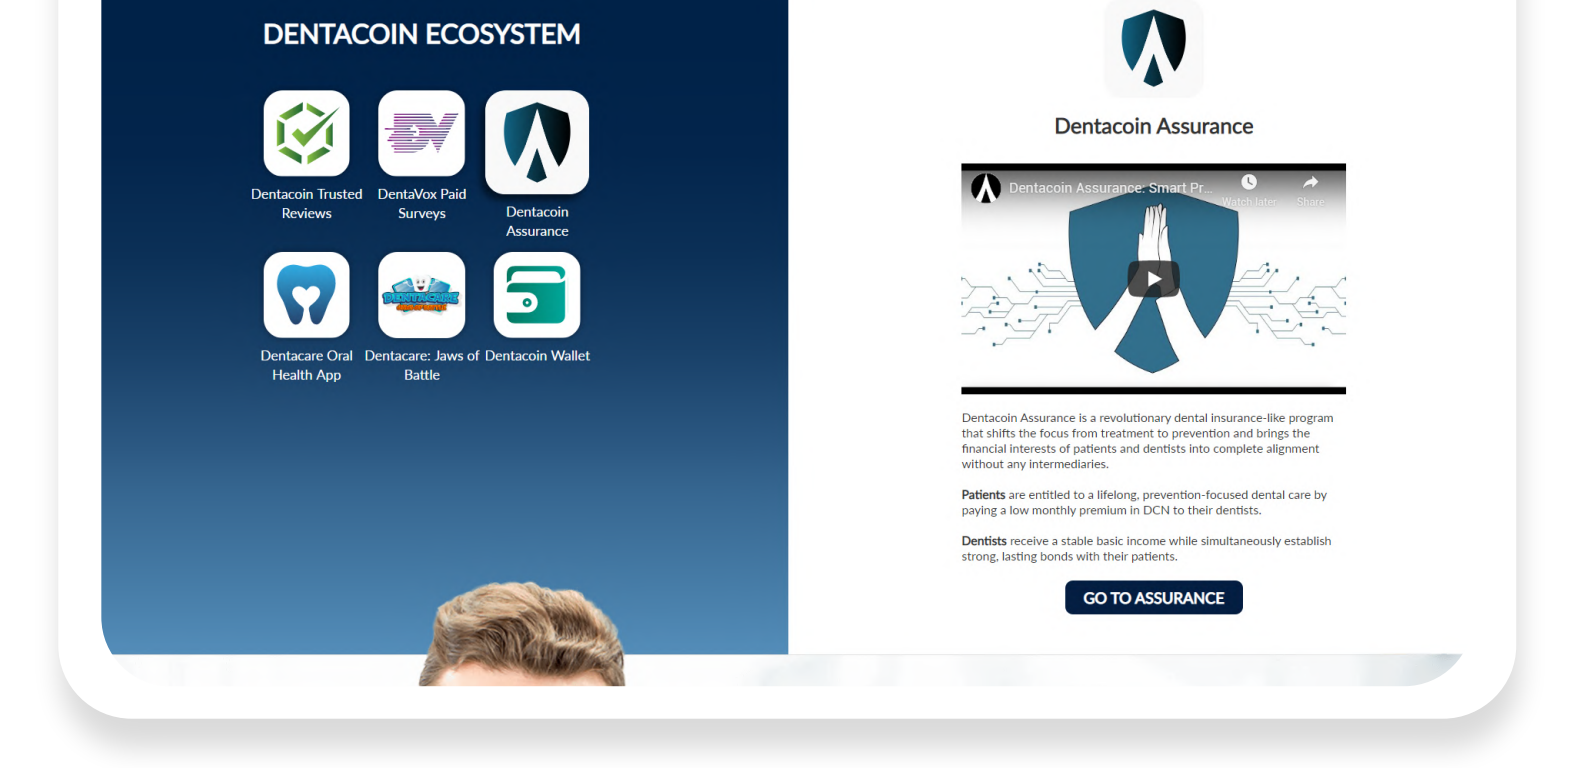

• INFORM THEM

Make sure your patients are aware they can have preventive care and basic treatments covered with a simple, Assurance contract, concluded directly between you and them. Your own rules, no intermediates.

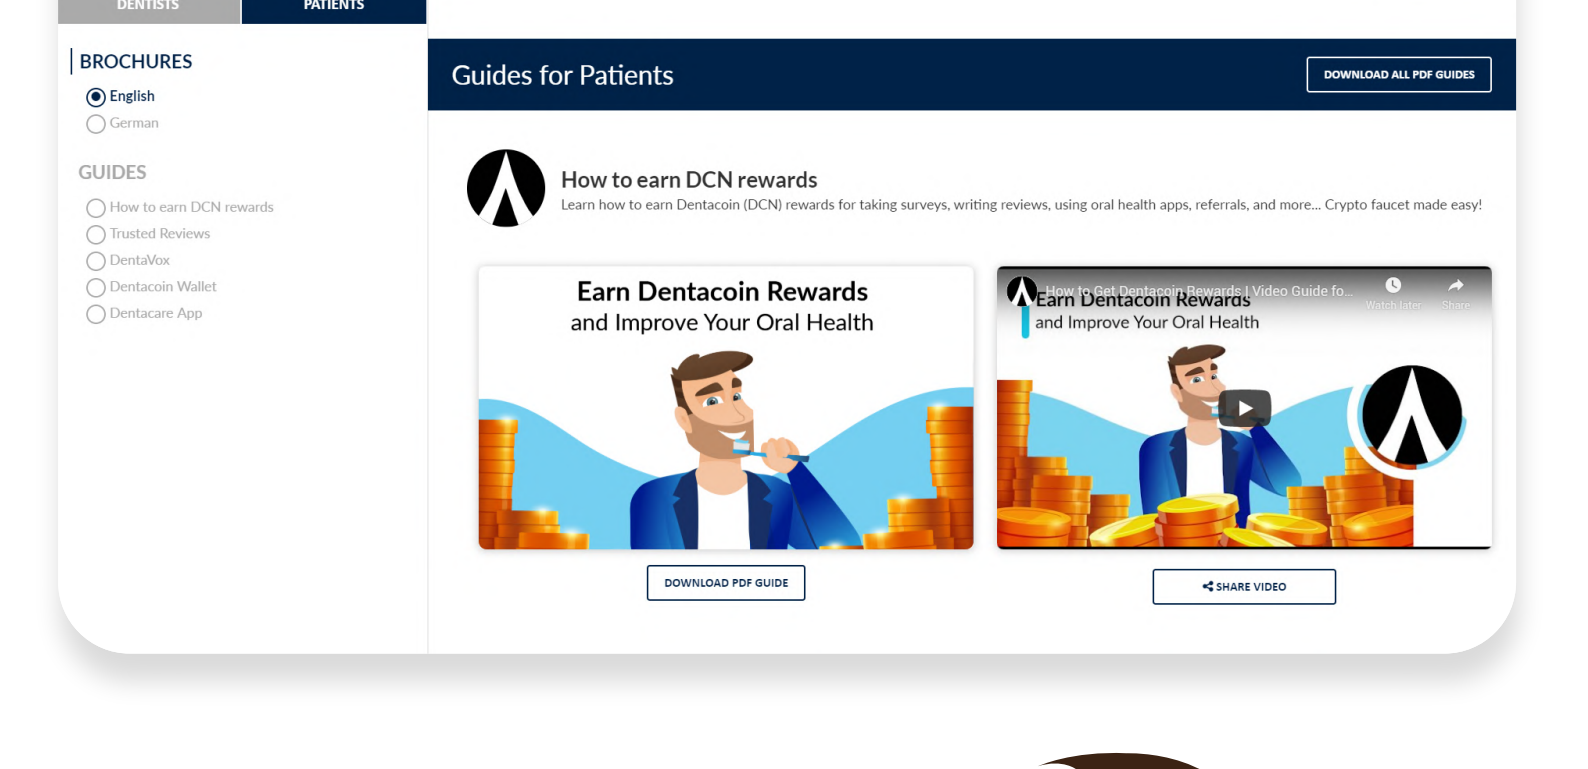

• PRESENT DENTACOIN

Inform your patients they can earn DCN by taking surveys, submitting reviews, using Dentacare oral health app. Thus, they will be able to reduce part of their monthly fees and receive preventive care at even more affordable rates.

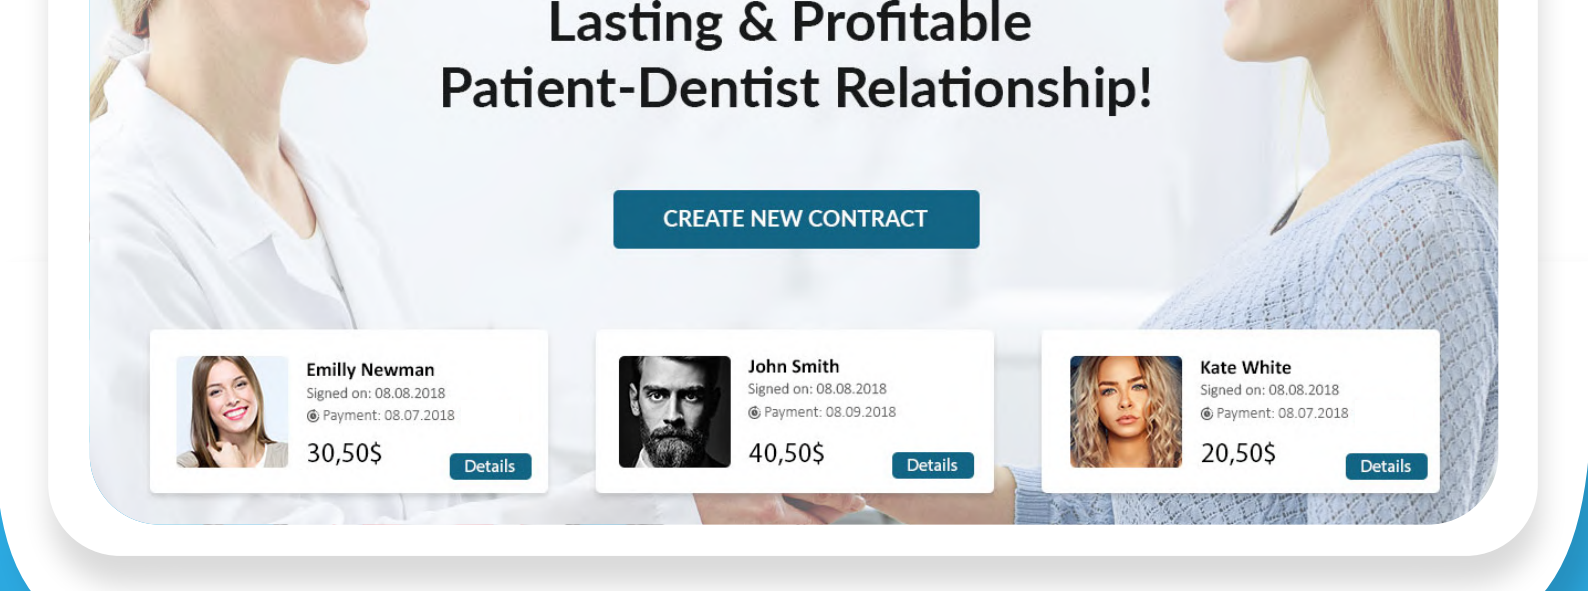

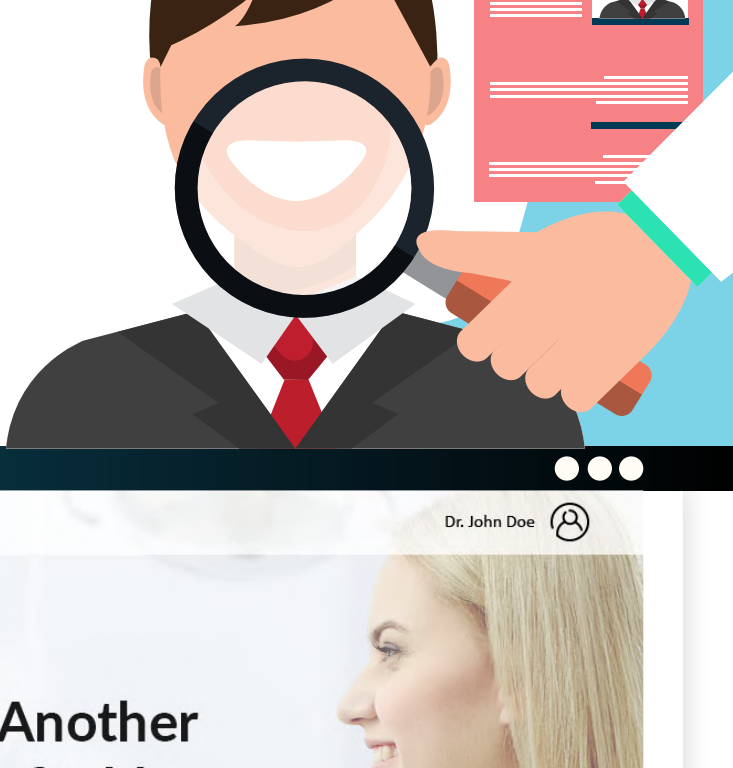

• HELP THEM LEARN

Use our ready patient tutorials to help them learn how to handle Dentacoin Assurance, use the other Dentacoin apps to their benefit, open a wallet and manage their DCN payments: <https://bit.ly/3cYRBqg>

• PRESELECT THEM

Depending on your practice's concept, it's likely that not all patients would be suitable for Dentacoin Assurance. Start small: Focus on people with decent oral health or such that have just finished their treatments. Cover basic care to retain them for long.
