

Help Your Patients Build Healthy Oral Hygiene Habits

YOUR BENEFITS:

Ensure your patients take proper at-home care of their teeth

Show them you care and increase your retention rates

Let patients get rewarded at no cost for you and boost their loyalty

Be a trendsetter by recommending a new-generation oral hygiene app

HOW IT WORKS IN 5 STEPS:

1

Explain patients about Dentacare - Health Training app. It rewards them with Dentacoin - the first dental cryptocurrency - for maintaining proper oral hygiene for 90 days.

2

Share that they can later use their rewards to cover treatment costs within a global network of dental practices (incl. yours, hopefully): www.dentacoin.com/partner-network.

3

Help them download the app if needed. They can easily register via Facebook or Civic; it takes just a few minutes.

4

Remind them they should use the app for the entire 90-day journey, every morning and evening, to get rewarded and build sustainable habits.

5

Beware of their progress by asking them frequently about their experience. Future updates will allow you to monitor your patients' performance remotely.

YOU HAVE PEDIATRIC PATIENTS?

Point them to the brand new Dentacare: Jaws of Battle game! It will teach them good oral hygiene and make them aware of bad habits through different characters and card battles.

www.jawsofbattle.dentacoin.com

HOW TO ENGAGE YOUR PATIENTS:

INVITE THEM

Send your patients download links to the Dentacare: Health Training App. Perfect timing? Just upon finishing their treatment, you can show them you care to ensure longlasting results!

SHARE ON SOCIAL

To reach a larger audience, share links to the app on your social media networks. It will not only impress current patients but might also show prospective patients that you are highly engaged with their long-term oral health.

Dentacare, the app that rewards people for establishing healthy dental care habits, is now available in AppStore! Yes, you read this right. The long awaited iOS version of the Dentacare Health Training mobile app is finally here!
